

September 17, 2024

Dear Hiring Manager,

I am writing to express my enthusiasm for the software engineering internship opportunity at your esteemed organization. As a third-year Computer Science undergraduate at the Indian Institute of Technology, Ropar, with a strong foundation in software development, machine learning, and competitive programming, I am eager to contribute by developing impactful software that drives meaningful change.

During my recent Machine Learning internship, I had the privilege of working on the IEEE SPS VIP Cup project under the guidance of Dr. Puneet Goyal. Our team successfully developed deep-learning models for retinal OCT image classification, leading to our selection as one of the three global finalists. This experience honed my ability to write production-level software, particularly in building models that enhance image quality and accuracy. I am confident that my experience with advanced ML techniques, such as Conditional GANs and ResNet-50, will enable me to contribute effectively to innovative projects at your company.

In addition to my internship experience, I have undertaken several projects that have prepared me well for this role. One notable project is the "Game of Cops and Robbers on Graphs," where I utilized C++ and the SFML library to develop a game with a highly efficient algorithm and an interactive GUI. This project, along with my work on reducing cache conflict misses and developing a RISC-V assembler, has equipped me with strong problem-solving skills and a deep understanding of system efficiency—qualities I believe are essential for contributing to the mission of any organization.

I am particularly drawn to this internship because it allows me to collaborate with other engineers and cross-functional stakeholders, which I find incredibly valuable. I am eager to continue learning, refining my skills, and making a tangible impact by developing high-quality software at your company. I am confident that my proactive approach to seeking and incorporating feedback and solid technical foundation will enable me to excel in this role.

Thank you for considering my application. I would welcome the opportunity to discuss how my background, skills, and experiences align with the needs of your team. I look forward to the possibility of contributing to your team and learning from the best in the industry.

Sincerely,

Ashish Gupta
